- **Quick Tips Video Series** - learn the various features and functions of the application in under 5 minutes

New Content in SAP Transformation Navigator - April 2020

SAP regularly updates the content of the application to reflect SAP’s new products, capabilities and strategy. With this update we ensure that you have access to the latest SAP product information and product recommendations in the tool.

All existing product maps are automatically updated with this new information and recommendation.

Upon logging into the application after the content update, the user may be informed that some recommendations in their maps may have been changed. Additionally, when opening a map containing new data, the user is prompted to double-check the information and to review any updated recommendations and/or open decisions.

The following type of changes are typically performed during a content update:

- New products included: e.g. HANA Cloud, SAP Cloud Platform Process Visibility
- Obsolete (i.e. sunset) products not used by any customer were removed from the application
- Products marked as ‘no longer on offer’ if not on SAP pricelist anymore, e.g. SAP Commercial Project Management for SAP S/4HANA, SAP Agricultural Contract Management
• Changes in product recommendations: e.g. *SAP Commercial Project Management for SAP S/4HANA* (the add-on version) now recommends the standard *SAP S/4HANA On-premise* product as the functionality is part of the main release; *SAP Business Planning and Consolidation* (both the MS Platform and NetWeaver version) have new recommendations.

• Update of capabilities & solutions based on new/removed products, changes in product recommendations or changes in modelling of solutions, e.g. new capabilities in technology areas like Databased and Data Management.

• Update of product categories and product names, to be in sync with SAP.com.

• Other updated information, like links to transition/upgrade guides, links to services, and other linked documents and assets.

*Pending updates* – to be finished in the next 1-3 weeks:

• Update of license information

• Update of content in PDF-guides
