Focused Build: Challenges

Challenges
- It's vital to a Focused Build project that an experienced Focused Build Coach is available
- SAP ITPPM is complex and not very easy to use

Solution
- Ruum
- Focused Build Templates
- Interface Ruum←→SAP Solution Manager

Focused Solution Services

Requirements-to-Deploy

Ruum by SAP & ITPPM Integration

Ruum by SAP is an agile, easy-to-use work management, light-weight project management, and collaboration platform for teams. You can plan, organize, follow up, and bring your team together with Ruum to run at full speed.

We connect Ruum with the ITPPM (Project and Portfolio Management) in SAP Solution Manager. It is especially designed for teams using Focused Build for S/4 implementation projects. With our service, Ruum can be seamlessly integrated into Focused Build.

But there is more: Our service includes extended content, task lists and concrete procedures for Focused Build Coaches. It has never been so easy to use Focused Build successfully in agile projects.
