What is Focused Build?
What is Focused Build?

Focused Build

Turn-Key Process Configuration and Integration
- Demand
- Design
- Development
- Test
- Deploy

Role-based Training Units

- Portfolio & Project Management
- Process Management
- Requirements Management
- UI5 Applications
- Change Control Management
- Release Management
- Test Suite
- Dashboards
- Standalone Enhancements

: Powerful, and flexible, configurable engines of SAP Solution Manager

: Turn-key solutions tuning powerful engines for a focused use case
Agenda

What’s new with SP3 and SP4

Product Roadmap
Project management
Project Management

SP3
- Improved filtering, support of favorites and variants in Project Landing page
- Enhanced Gantt Chart including Phases and Q-Gates
- Integration and Mass Change for Project Risks
- Navigation to related Work Packages and Work Items

SP4
- Multi-Project-View for Master / Build Projects to check synchronous scheduling
- Improved date maintenance for project elements
Process Management
Process Management

SP3
- Conflict display in DropDocs
- Auto-creation of required documents

SP4
- Possibility to address composite interfaces in Requirement, Work Package and Item
- Visibility of test scripts (CBTA) and recognition for KPI rating (CBTA + Test Steps)
- Solution Documentation Scope Integration
- Documentation tab additionally available for
  - Request for Change
  - Standard / Urgent Change
  - Defect Correction
Requirement Management
Requirement Management

SP3
- Upload of requirements from CAL system or Model Company
- Extended search options for requirements
- Extended search options of work package assignment
- My Requirement app additional filter sections
- Additional columns in the Requirements table view of the Solution Readiness Dashboard

SP4
- T-shirt sizes for value, effort and story points
- Create and report requirements based on Solution Documentation Scope
Work Package / Work Item
Work Package / Work Item

SP3
- E-mail notification for owner, developer and tester
- Automated copy of requirement attachment to Work Package
- New authorization object to control date fields
- Create Defect Correction out of a Work Package
- Value and effort points for Work Packages
- Additional filter section for status and overdue documents
- Automated population of project manager field
- Test Management tab for Work Packages
- Business Role Tester for Work Packages
- “Created by” and “Last changed by” information
- Combined view for Work Item (GC) an Work Item (NC) in Mass Change application

SP4
- Non-functional work item support
- Improved search for systems
- Edit functionality in Test Management tab for Work Packages
- Display only role in Mass Change application
Defect / Defect Correction
Defect and Defect Correction

SP3
- Unfinished Defect Corrections with Prio 3 and 4 are automatically handed over to the next release

SP4
- Project and Wave information in Defect Correction
- Documentation tab added to the Defect Correction application
- New tile “Defect Correction in Single Functional Test” in the Solution Readiness Dashboard
- Defect Correction information in the Work Package details of the Solution Readiness Dashboard
- Mass Change application for Defects
External Integration
Scrum Board API

SP3

- API provides for Work Items information about related Work Items
- API provides methods to build a Kanban Board for defect corrections
The Picture shows an example of a ScrumBoard solution of bsc who has build a solution based on the API.

Scrum Board API- Implementations from Software Vendors

The Pictures show an example of a ScrumBoard solution of CoreALM who has build a solution based on the API.

Copyright by CoreALM
SP4

- Creation of requirements in Focused Build from an external tool using an OData web service
- Requirement status change is sent back to external tool
Test Management
Test Management

SP3
- New landing page in My Test Executions with integrated search
- Customizable custom fields in Test Steps Designer and My Test Executions
- Uploading Test Steps from file
- Multilingual test cases with API integration for automated translation
- New test case groups in Test Steps Designer
- Change log tab in My Test Executions
- Automatic test cases can be executed from My Test Executions
- Performance improvements and many further small improvements

SP4
- Improved up-/download functionality in Test Steps Designer
- Drag&drop attachment in Test Steps Designer
- Add new content from Solution Documentation to Test Steps test case
- Customizable comment field in My Test Executions
- “On Behalf Of” functionality in My Test Executions support change mode
- Usability improvements
- Other’s Test Results visible for testers
- Usage of live data instead of BW data in Test Suite Dashboard
- New tile in Solution Readiness Dashboard for “Single Functional Test Cases”
Solution Readiness Dashboard
Solution Readiness Dashboard

SP4
- Missing KPIs displayed in the tiles
- Extraction performance improvements
Release Dashboard
Release Dashboard

SP3
- Integration of Mass Change application into the Release Dashboard
- Tile customizing to hide not needed tiles

SP4
- Additional columns in the Defect Corrections table view
- Additional filter options in the result tables
- Selection Summary display
Fix Pace
Fix Pace

SP4

- New Fix Process for Focused Build projects with
  - Request for Change
  - Urgent Change
  - Standard Change
Product Roadmap
# SAP Focused Build

## Product road map overview

<table>
<thead>
