**SAP Cloud Platform**
Platform services and data management
SAP Cloud ALM for Implementation
Capabilities & Functions Map

This is the current state of future vision and may be changed by SAP at any time.

*Planned for future releases
Test Planning and Preparation
Test Readiness Overview

- Tests are prepared based on the processes scoped in each rollout.
- The overview displays test cases by process flow and highlights their Preparation Status.
- Test Readiness can be defined by process flow.
Test Planning and Preparation

Test Case Overview

- The overview screen displays all test cases that exist in a selected process flow and their respective preparation status
- Manual Test Cases can also be created in the test case overview section
Manual Testing
Manual Test Case Creation

- Creation of manual test cases is done based on business activities from the selected process flow
- Relevant business activities should be scoped so they are included in the test case
- The overall structure of the test case is created through the numerical order of these activities
Manual Testing
Manual Test Case Activity Creation

- Test actions can be created for selected business activities using rich text editing capabilities
- Instructions and expected results are maintained in a single view
Manual Testing
Manual Test Case Preparation

- Test cases that are ready to be executed should have the status set to “Test Case Prepared”
- The test case will then be visible as ready for execution if the corresponding process flow has been released for testing
