SAP Change and Transport System

SAP Change and Transport System manage SAP and Non-SAP development objects

Scope
- Establish one tool to transport SAP and Non-SAP objects
- Integrate own applications via script or API

Benefits
- One tool to manage SAP and Non-SAP objects (e.g. ABAP, PI, HANA, BOE…)
- 100% transparency of all changes
- Synchronized import into dual stack systems
- A central administration interface for all types of transports and systems
- CTS+ integration into development workbenches
- Tracking and management of Non-SAP objects with Quality Gate Management and Change Request Management
- Different variants to integrate Non-SAP applications
