Application-Specific Upgrade (ASU) Toolbox

Description
- Before / after a technical upgrade often additional application-specific steps need to be performed → ASU collects and summarizes these activities
- Enables you to recognize the necessary steps and perform them in a controlled manner

Further Information / Tool Access
- ASU toolbox is integrated with the upgrade GUI through the ASU phase in the upgrade process
- For further details check SAP Note 1000009

Benefits
- One tool for all kinds of predefined tasks (reducing the upgrade time)
- More transparent upgrades (avoid mistakes)
- Avoidance of problems after the upgrade (problem message reduction)
- Extension of the toolbox with own content or by adding news steps to delivered SAP content is possible
