   - Configuration of ITPPM & Ruum (SAP)

2. **Test**
   - Integration Test (SAP, Customer)

3. **GoLive**
   - Workshop (SAP, Customer)
   - Final acceptance (Customer, SAP)
## Use Case: Work Management Platform for Focused Build

### Use Case:
- Planning and execution of agile S4H Implementation Project with Focused Build
- Plan and control the requirements to deploy methodology as Focused Build Coach or Customer Focused Build Lead
- Shared documentation in one place

### Problem:
- Guidance for Focused Build Coaches or Customer Focused Build leads not available
- Many stakeholders, tons of emails, non-transparent, ineffective
- People are busy with admin work instead of focusing on the project and tasks

### Solution
- Ruum is the leading system
- Focus of the Ruum template is Focused Build - Requirements to Deploy Methodology
- The Ruum template reflect the SAP Activate Project Phases
- Ruum is integrated in ITPPM
- Focused Build project template is used in ITPPM
- The Focused Build “Solution Readiness Dashboard” reflect the status of the Ruums
- Ruum is used for:
  - Work Management
  - Collaboration of project teams and members
  - Facilitate agile working with multiple scrum teams
  - Project document management

### Central Roles
- SAP Focused Build Coach
- Customer Focused Build Lead
- Customer Project Manager
Ruum as Single Point of Truth

Collaborate
Bring the right people and data together
