SAP Globalization Services Webinar
Report Generation Utility for MENA

SAP GS, MENA Localization Team
June, 2016
Preface
Market Needs

- Changes in legal reporting and its layout is now more frequent
- Customers demand for specific reporting not covered under localization
- Customers want to have these reports ready in very short time
- Customers ask for complicated reporting that collects data from various master data tables
Delivery Challenge

- Localization scope still limited to legal reporting
- Customer specific requirement cannot be included
- It takes long time to deliver updates for one country
- Hard to prioritize the demand as we are covering the whole MENA region
- Even simple layout modifications must go through localization support
One Utility for All

- A utility that can help customer to meet his needs explained
- A utility that can help all customers in all MENA region
- Simplified steps to create complicated reports with different layouts (ALV or Adobe)
