**Repeatable Custom Solution: asset accounting multiple calendar tool**

**Release Availability Documentation**

**Available Software Releases and Required Base Software for the Repeatable Custom Solution Asset Accounting Multiple Calendar Tool**

The Repeatable Custom Solution asset accounting multiple calendar tool consists of the software items listed in the below table.

This table lists the currently available releases of the software items, and for each release the basis software required to install and use the Repeatable Custom Solution. In addition, the table lists per release of a software item the date until which SAP offers maintenance. For avoidance of doubt, the maintenance duration for the Repeatable Custom Solution in general can be shorter than the duration of individual software items.

**Planned maintenance duration** for the Repeatable Custom Solution in general is until **31.12.2022**. This will be realized by either providing new releases of the Repeatable Custom Solution, which will be added to the table accordingly or by extending the maintenance period of the existing release levels at given time. Maintenance scope details can be found under [https://support.sap.com/maintenance](https://support.sap.com/maintenance) and [http://support.sap.com/rcs](http://support.sap.com/rcs).

In order to clarify on country availability, please contact an authorized SAP sales representative.

1) In order to request the availability of a subsequent but not yet released SAP Feature Package for usage with the software add-on, the customer will notify SAP twelve (12) weeks in advance via a support message submitted under the message component XX-PROJ-CDP-188 before the intended application of the SAP Feature Package.

2) The installation notes contain additional information about the installation prerequisites.

3) Documentation is partially available in German in accordance with SAP’s Globalization Standard.

4) You need all packages listed per line for implementing the full solution scope

5) Release Validity of the as asset accounting multiple calendar tool part of SAP Note 2321211:

Release Validity of the asset accounting multiple calendar tool:

- The asset accounting multiple calendar tool is available for the software components SAP_FIN 600 to SAP_FIN 618 (→ SAP ERP 6.0 Enhancement Package 01 - 08).
  - To use the tool an add-on must be installed. Status Q3/2016 three support packages for the respective add-on are released.

- Important Information:
  - If you have activated business functions that enhance the General Ledger or Asset Accounting functions or both (for example, the business function FIN_GL_REORG_1 or the business function FIN_GL_CI_3), this may result in additional development effort that is subject to a fee. This requires case-by-case consideration.
  - If the business function FIN_AA_PARALLEL_VAL (available with Enhancement Package 07) and therefore use of Asset Accounting (new) is activated, the RCS asset accounting multiple calendar tool cannot be used.
o As of software component SAP_FIN 700 and thus use of SAP Simple Finance with Asset Accounting (new), the RCS asset accounting multiple Calendar tool cannot be used.

o As of software component S4CORE 100 (→ S/4HANA with SAP S/4HANA Finance and thus with Asset Accounting (new)), the RCS asset accounting multiple calendar tool cannot be used.
  ▪ But status Q2/2016 Asset Accounting (new) does not solve the fiscal year variant issues of Asset Accounting from SAP Note 844029. If you still require a solution to this issue, contact the SAP contact persons mentioned at the end of this SAP Note.

o If you still use a release lower than software component SAP_FIN 600 and must solve the above issue, contact the specified SAP contact persons mentioned at the end of this SAP Note.
