Release Availability Documentation

Available Software Releases and Required Base Software for the Repeatable Custom Solution Intelligent traffic management

This document lists the currently available releases for Intelligent traffic management, and for each release, the basis software required to install and use the solution. In addition, the table below lists the different languages available for each release, and per release the date until which SAP offers maintenance. Maintenance scope details can be found under www.service.sap.com/maintenance and http://service.sap.com/rcs/availability.

Planned maintenance duration for the product in general is until 31.05.2021. This will be realized by either providing new releases of the software which will be added to the table accordingly or by extending the maintenance period of the existing release levels at given time.

In order to clarify on country availability, please contact an authorized SAP sales representative.

This document can be considered as part of the available documentation for each release of the Intelligent traffic management application.

1) In order to request the availability of a subsequent but not yet released SAP Enhancement Package for usage with the software, the customer will notify SAP twelve (12) weeks in advance in writing via a support message submitted under the message component XX-PROJ-CDP-554 before the intended application of the SAP Enhancement Package.

2) The installation notes contain additional information about the installation prerequisites.

3) According to the SAP Globalization Standard, the translation scope varies depending on the language. English is the only language in which all product documentation is available. Certain types of documentation (such as guides or Customizing documentation) may not be available in all the languages listed here.
